From measurements of proton groups.
\(^b\) (1958KU81) report \(E_x = 1.080 \pm 0.010\) MeV.
\(^c\) From measurements of \(\gamma\)-rays.
\(^d\) The transition 1.13 \(\rightarrow\) 0.94 is observed: \(E_\gamma = 189 \pm 4\) keV (1960RA18).
\(^e\) Observed but \(E_x\) not determined.
\(^g\) See discussion in (1968MA53) and Table 18.14.
